

DOLE Holds Coastal Clean-up Drive and Tree Planting Activity

The Department of Labor and Employment (DOLE) conducted a coastal clean-up drive and tree planting activity at the Baseco Compound, Port Area in Manila on 30 November 2019 as a kick-off activity for its week-long 86th Anniversary celebration.

The Department has partnered with the Department of Environment and Natural Resources (DENR) and the City Government of Manila for the conduct of this activity.

A total of fifty-five seedlings were planted during the tree planting. On the other hand, after the clean-up activity, all the sacks filled with trash were collected by the LGU Manila-Department of Public Services (DPS).

This activity is in line with DOLE's Green Our Dole Program (GODP), a DOLE campaign that seeks to strengthen the advocacy on green issues and mitigation solutions on climate change for better delivery of programs and services to the public. It also seeks to strengthen awareness and consciousness on the concepts, principles and applications of green productivity.

The Bureau of Labor Relations (BLR) together with other bureaus, services and attached agencies participated in the activity.
